

ANGULAR SENSOR

Relative angle in the vertical plane between two sensors

- The sensor reads the relative angle in the vertical plane between two sensors
- The output 4-20mA can be calibrated to represent any angle sector up to 0-360°
- Compact design: 30x70x15mm (b x l x h)
- Cable length: specified at order
- Connector: specified at order

SPECIFICATIONS:

Power & output	24Vdc, 4-20mA
Depthrating	6000 m
