

# MANIPULATOR RELAY STATION

For ROV over the horizon operation.

- One unit is installed offshore, and the other is installed onshore (or other location). Communicates over ethernet connection
- Schilling Master can be connected at both stations, but the offshore Master has priority when it comes to control
- Used with KD ROVs, the offshore unit can be used with a game pad to control Atlas or other manipulator/units connected to the ROV's AUX system

## SPECIFICATIONS:

Connection	Schilling Master or game pad
------------	------------------------------

X	XXX
---	-----

## PART NO.:

104xxx	Manipulator Relay Station
